

CAMPING SPOTS FOR RV'S, MOTOR HOMES, CARS WITH TENTS AND TRAILERS

Not drawn to scale . .

The spots with red X's are not available.

Every spot is made to pull into and to back out of.

It is hard to see from the photo but this is the flattest part of the ground.

Notice the ditch in the middle. If it rains, this is wet as the pictures shows. In this case, the crossing will be modified. You will enter off the road and continue East along the fence line over a drainage tile that is approximately 11' wide with a drop off on one side.
